

Description and Illustration of Use: A \LaTeX Template for Filler for The American Mathematical Monthly

Text for the filler will go here. Please note that this filler uses the MONTHLY's style file `maa.monthly.sty`. The MONTHLY style incorporates the following \LaTeX packages. Therefore, these packages should *not* be included in the document preamble.

- `times`
- `pifont`
- `graphicx` (this package is included in the MONTHLY \TeX style file and might cause errors or conflicts when compiling your document. If you remove it, it should compile just fine.)
- `color`
- AMS styles: `amsmath`, `amsthm`, `amsfonts`, `amssymb`
- `url`

MONTHLY fillers are 1 page or less than 1 page.

References. Beginning in January 2024 the MONTHLY will use the NLM reference style. Bib \TeX users should use (`vancouver.bst`) to typeset their references.

The Code. To cite a reference in-text use

`\cite{key}`

where `key` is the name of the reference used in your `.bib` file. In the place where you want to put your bibliography, type the following commands:

```
\bibliographystyle{vancouver}
\bibliography{MonthlyReferences}
```

where `vancouver` is the name of a `.bst` file and `MonthlyReferences` is the name of your `.bib` file.

Example with Citations. We will cite many authors in this paper whose work is notable, [1, 2].
