This section contains problems intended to challenge students and teachers of college mathematics. We urge you to participate actively both by submitting solutions and by proposing problems that are new and interesting. To promote variety, the editors welcome problem proposals that span the entire undergraduate curriculum.

Proposed problems and solutions to the problems in this issue should be uploaded to the submission management system **Submittable** by visiting <https://cmj.submittable.com/submit> (instructions are provided at this site). The following file formats are accepted by **Submittable**: (1) pdf with \LaTeX source (ideal) or (2) Word document. If there are any issues in accessing or using **Submittable** for problems and solutions, respectively, please email cmjproblems@maa.org and cmjsolutions@maa.org for assistance.

Problems are accepted on a rolling basis and are welcomed at all times. Whenever possible, a proposed problem should be accompanied by a solution, appropriate references, and any other material that would be helpful to the editors. Ideal problem proposals, including solutions, should not exceed 3 pages. Proposers should submit problems only if the proposed problem is not under consideration by another journal.

Solutions to the problems in this issue received through **Submittable** by (INSERT DATE) will be given full consideration.
